

SPECIFICATION

LMT finishes are a range of real semi-precious decorative metal finishes for interior and exterior applications that we apply and hand polish in our factory. We can coat onto base materials such as MDF, Melamine, metals, etc. Refer to our Material Data Sheet for further information on the finishes including maintenance and substrate requirements.

As our finishes are available in a range of colours, textures and patinas it is best to specify as follows.

Manufacturer: Liquid Metal Technologies

Type: Bronze, Copper, Brass, Aluminium, Antique Bronze, Zinc, Antique Copper, Antique Brass, Tahiti, Pewter, Graphite, Smoked Chrome, Rose Alloy, Aqualloy, Iron, Gold, Platinum, Gunmetal.

Texture: Level of polish or texture specified for surface treatment i.e Linish/ Shiny/ Modern/ Retro, etc

Ageing: Brown Florentine / Florentine / Pearl Patina / Natural Green Patina / Rust / Orange Rust

Topcoat: The standard topcoat used on our samples is a Semi-gloss. Our samples do not always say this on the stamp, however will say if they have a gloss, or no sealer. Options are Semi gloss / Gloss / Matt / N/A / Anti Graffiti (this is a glossier effect than our standard topcoat).

Substrate: MDF / aluminium / mild steel / glass / phenolic resin etc.

As an example for a Copper Modern Natural Green patina you would write:

Manufacturer: Liquid Metal Technologies

Type: Copper

Texture: Modern

Patina: Natural Green

Topcoat: Semi gloss

Substrate: 12mm MDF

It is best if you can include a clear image of the sample or photo you are referencing in your specification as well. All samples we send out should be stamped with the metal type, texture, patina if any.
